DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 11-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 11-20 are directed to information stored on a medium. Since the information do not provide any functional interrelationship to the medium to control the medium fro accessing the information, are impart to software and hardware structural component to provide certain function that is processed by a computer, the information do not make them statutory. See MPEP 2100.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 11-12 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 11-12 of prior U.S. Patent No. 6,631,387. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-10 and 13- 40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S. Patent No. 6,631,387). Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claims 1-10 and 13-40 of the present application and claims 1-26 of U.S. Patent No. 6,631,387 are that claims 1-10 and 13-40 do not specify that the medium is a rewritable medium as that being recited in claims 1-26, of U.S. Patent No. 6,631,387. However, using an medium or an rewritable medium as an alternative to each other for storing data is well known in the art .. Therefore official notice is taken and it would have been obvious to one of ordinary skill in the art to modify claims 1-26 of U.S. Patent No. 6,631,387 by providing a medium as an alternative to the rewritable medium of claims 1-26 of U.S. Patent No. 6,631,387 for storing the data and to produce claims 1-10 and 13-40 of the present application.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taira et al teaches apparatus for recording navigation information with the data .
